SaniSorb® Medical Liquid Solidifier

SaniSorb® from Multisorb Technologies is the first liquid solidifier with a self-bursting technology to quickly absorb and immobilize fluid. SaniSorb provides fast and easy infectious waste fluid containment in operating room suction canisters and Red Bag waste by quickly solidifying biohazardous fluids. SaniSorb pre-measured rupturing pouches eliminate the tearing and spillage associated with conventional products. Self-activating technology reduces particulates and bacterial exposure. Available in four standard sizes, the pouches dissolve within minutes on contact with fluid to quickly absorb and immobilize fluid.

SaniSorb 15 gram Pouch Usage Directions

It is a violation of Federal Law to use this pesticide in a manner inconsistent with its labeling.

- Wear gloves and eye protection when handling infectious waste.
