

Humonitor®

Cobalt-Free Humidity Indicator Cards

Advantages

- Easy to use and read for fast monitoring
- Cobalt-free cards are EU 2002/95/EC & WEEE 2002/96/EC friendly
- Wide range of indicating cards available to support a variety of environmental needs
- Sensitive indicating element calibrated for permanent accuracy to $\pm 5\%$ of relative humidity
- Cards can be custom designed for your specific applications

Cobalt-free for more environmentally-friendly humidity monitoring

Humonitor Humidity Indicator Cards show you at a glance if moisture within sealed containers or closed spaces is at an acceptable level. Humonitor cards help monitor desiccant activity and are ideal for use with or without desiccants in any application where moisture control is critical.

An easily identified colour change from brown to azure (light blue) indicates an unsealed container and/or damaging level of humidity, allowing you to tell at a glance whether the product requires re-inspection or re-packaging.

The cobalt-free indicating chemistry is designed to help manufacturers comply with evolving EU and WEEE directives regarding hazardous substances.

A full line of cards provides choices for every application

We understand that your packaging needs are of the utmost importance. Only highquality products designed to meet your particular needs are acceptable. Multisorb Technologies offers a full line of Humonitor Humidity Indicator Cards to meet your requirements.

IMPORTANT NOTICE: Manufacturer/Seller (collectively "Seller") disclaims any warranty for the product sample ("Sample") which Sample is provided "AS IS" without warranty of any kind, either express or implied, including without limitation, the implied warranties of merchantability, fitness for a particular purpose or non-infringement. Seller does not guarantee the accuracy or completeness of any statements made regarding the Sample. User assumes all risk and liability in using the Sample. SELLER SHALL NOT BE LIABLE IN TORT OR CONTRACT FOR ANY LOSS OR DAMAGE, DIRECT, INCIDENTAL, OR CONSEQUENTIAL, ARISING OUT OF THE USE OF OR INABILITY TO USE THE SAMPLE. USER agrees to defend and indemnify Seller from all claims, liabilities, and costs (including attorneys' fees) related to User's use of the Sample. User is prohibited from re-selling Sample.

Made with proprietary manufacturing technology, Multisorb's Humonitor cards provide reliable and accurate readings, time after time.

Several cards feature a reference colour comparator, making it easier to determine the condition of the indicator.

Indicating materials to meet your exacting specifications

Multisorb has a broad range of humidity indicating products that change colours at a variety of relative humidities. If you have an application that requires specialized indications, we can work with you to develop a Humonitor card to meet your exacting specifications. Be sure to ask your Multisorb representative about custom printing Humonitor cards.
