

SUPPLY CHAIN
PROTECTION FEATURE

Protect Your Product From the Inside Out

Custom Printed Packets Protect Your Brand and Your Commitment to Quality

Custom printed desiccant and oxygen absorber packets add an additional layer of supply chain security, brand protection, and quality control inside every package. By standardizing component identification across regions, they simplify the management of multiple SKUs and manufacturing sites, ultimately reducing packaging variability and errors.

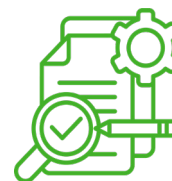

*Turn an unseen component into a **control point** for quality, compliance, and customer confidence, inside every bottle.*

Standardize component identification across your supply chain in each packaging location.

Protect Product Authenticity makes it easy for customers and inspectors to identify genuine products.

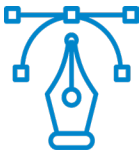

Improve Quality Assurance for operators and inspectors to visually confirm correct packet during production.

Bring Your Brand Inside Every Package

Multisorb custom printing integrates your brand directly onto desiccant and oxygen absorber packets, enabling supply chain control and consistent packaging across global manufacturing operations.

1 Provide Your Logo

2 Approve Design

3 Multisorb Printing

4 Integrate Into Your Product

Designed to integrate with your existing process - no disruption required.

When does custom printing make sense?

- Cut sorbent mix-up risk at CMOs with custom-printed packets that are 'right' or 'wrong' at a glance.
- Reinforce your brand and customer trust inside the bottle with professional branded packets.

Products eligible for custom printing:

Custom printing available for StripPax®, NatraSorb®, and StabilOx® of 1 Million+ units.

Ideal Applications

Pharmaceutical Products

Nutraceutical & Supplements

Food – Human & Pet
